JABABEKA | 投资者专题报道 • 简体中文

印尼 Jababeka（KIJA）迈入增长新阶段：以基础设施、工业地产、教育与医疗为支柱，实现建设 100 座城市的愿景

通过并购扩大基础设施业务，推动与新加坡胜科集团合作的肯达尔工业园发展，探索丹绒勒松与摩罗泰两个经济特区的国际合作机会，并以总统大学及总统大学研究与教学医院为人才培养和社会发展的重要基础。

雅加达，2026 年 10 月 — 印尼上市公司 PT Kawasan Industri Jababeka Tbk（印尼证券交易所股票代码：KIJA）正在推动长期业务转型，以两大增长引擎为核心：一是能够持续产生经常性收入的基础设施业务，二是工业园区和房地产开发业务。

与此同时，公司积极发展位于万丹省的丹绒勒松经济特区（Tanjung Lesung）及北马鲁古省的摩罗泰经济特区（Morotai），并通过教育、医疗及国际合作，为区域经济发展奠定长期基础。

Jababeka 计划邀请国际基金经理、证券公司、资本市场分析师及机构投资者参加投资者交流会，介绍公司的未来发展战略。

Jababeka 创始人 S. D. Darmono 表示，公司的使命从来不只是向投资者出售工业用地，而是建设能够创造就业机会、培养人才、促进国际投资并提高人民生活质量的完整经济生态系统。

一、Jababeka Infrastructure：通过并购扩大经常性收入

Jababeka 正在加强旗下基础设施公司 PT Jababeka Infrastruktur（JI）的管理与发展，并介绍前印尼国家铁路公司 PT Kereta Api Indonesia 总裁 Didiek Hartantyo 担任该公司的监事会主席（President Commissioner）。

Didiek Hartantyo 曾担任印尼国家铁路公司总裁、财务董事，并在印尼 Bank Mandiri 担任企业银行业务高级管理职务，在企业融资、大型企业管理及基础设施领域拥有丰富经验。

未来，JI 计划通过企业合并、收购及战略合作扩大业务规模，重点关注电力、能源、供水、污水处理、物流以及工业园区基础设施。

公司希望通过严格的投资评估和财务管理，扩大具有稳定现金流的业务，使基础设施成为 KIJA 长期增长的重要引擎。

二、肯达尔工业园：推动工业地产增长

在工业地产领域，肯达尔工业园（Kendal Industrial Park，KIK）正成为 KIJA 最重要的增长动力之一。

KIK 是 Jababeka 与新加坡胜科发展公司（Sembcorp Development）的合资企业，双方分别持有 51%和 49%的股份。

该合作结合了 Jababeka 在印尼工业园区开发方面的丰富经验，以及胜科集团的国际投资网络与工业园区开发能力。作为印尼经济特区之一，肯达尔已成为国际制造业投资的重要目的地。

2026 年上半年，肯达尔贡献了 KIJA 约 71%的预售业绩，而 KIJA 同期的总营销销售额达到 1.19 万亿印尼盾。

随着国际制造业投资及配套产业持续发展，肯达尔有望进一步提高对 KIJA 工业地产收入和利润的贡献。

三、总统大学：25 年前开始的人才发展战略

Jababeka 对人才发展的重视始于 25 年前。

2001 年，S. D. Darmono 与多位印尼国家领导人及教育界人士共同创立总统大学教育基金会（Yayasan Pendidikan Universitas Presiden），其中包括已故的 Juwono Sudarsono 教授。他曾担任印尼教育与文化部长及国防部长。

据 Darmono 介绍，该教育事业在筹建初期也获得了时任印尼总统 Abdurrahman Wahid（Gus Dur）的支持与祝福。

成立总统大学的主要目的，是培养能够在国际工业环境中工作的印尼人才，并通过高素质人力资源增强印尼吸引外国直接投资的能力。

芝卡朗（Cikarang）拥有七个大型工业园区以及来自世界各国的数千家工厂，是实施这一教育理念的理想地点。这些跨国企业为总统大学学生提供实习、职业培训和在岗培训（On-the-Job Training）的机会。

总统大学不仅教授理论知识，也注重实际工作经验、外语能力、工业纪律、团队合作和跨文化沟通。

通过共同生活建立国际友谊

总统大学的另一项特色，是强调国际学生与印尼学生之间的共同生活与文化交流。大学通过宿舍生活及校园活动，让不同国家、民族、文化和宗教背景的学生建立友谊。

学生不仅学习专业知识，也学习尊重文化差异、理解其他国家的价值观，并培养独立、纪律和合作精神。

Darmono 相信，大学时代建立的国际友谊，未来可以成为印尼与世界各国开展经济、科技及文化合作的重要社会资本。国际毕业生未来还可能成为印尼与其祖国之间的桥梁。

这正是总统大学“Bringing Civilizations Together”（汇聚不同文明）的核心理念。

四、从乡村诊所到医学院和现代化教学医院

Jababeka 对公共卫生的长期承诺，早在现代化医院建设之前就已经开始。

大约 30 年前，在丹绒勒松旅游区开发初期，Jababeka 便兴建了一所诊所，为万丹省南部地区的居民提供基本医疗服务。

据 Darmono 回忆，当时该地区医疗设施十分有限，许多居民需要长途跋涉才能获得适当的医疗服务。设立诊所的目的，是让当地居民也能分享区域开发带来的实际利益。

工业园区和旅游区的发展，不应只服务于投资者和游客，也必须改善当地人民的教育、健康与生活条件。

这一理念如今进一步发展成为高等医学教育及现代医疗服务体系。2023 年，总统大学正式设立医学院（Faculty of Medicine），重点关注职业健康、医学教育和公共卫生，同时与印尼帕查查兰大学（Universitas Padjadjaran）开展医学教育合作。

由于总统大学位于大型工业区之中，医学院在职业健康、工业安全、疾病预防及劳动者健康方面具有独特的发展优势。

2026 年 10 月 10 日，总统大学研究与教学医院（President University Research & Teaching Hospital，简称 PURTH）举行了初步启用仪式，成为 Jababeka Medical City 发展的重要组成部分。

PURTH 将逐步整合医疗服务与疾病预防、医学生和青年医生的临床培训、医学研究与国际学术合作、先进诊断技术及医疗创新四项核心功能。

医院计划逐步发展癌症、心血管疾病、精准诊断、健康检查及其他专科服务，并积极与国际医学专家和研究机构建立合作关系。

对于工业园区投资者而言，优质医院、国际学校和大学，与土地、电力、供水及交通基础设施同样重要。这些设施不仅服务企业员工及其家庭，也有助于吸引国际专业人才和长期投资。

五、丹绒勒松经济特区：探索与中国福州的“双园”合作机会

Jababeka 通过旗下 PT Banten West Java Tourism Development（BWJ）开发万丹省丹绒勒松经济特区。

除了旅游业，Jababeka 长期支持当地教育发展，已在 Cikadu 地区及周边建设小学、初中及总统高中（President Senior High School）等教育设施。

这些学校与约 30 年前建设的社区诊所一样，体现了 Jababeka 对当地居民长期发展的承诺。

在 Jababeka 及中国福建省福州相关方面开展相互访问与初步接触后，BWJ 正探索以“两国双园”（Two Countries, Twin Parks）为构想的潜在合作机会，重点关注旅游、教育、渔业及水产品加工。目前尚未签署合作谅解备忘录（MoU），也未达成正式项目协议。

上述构想与印尼和中国推动经贸合作的总体方向相契合；具体项目仍需双方进一步磋商，并取得必要的同意与批准。Jababeka 希望未来通过国际投资、人才培训、旅游设施建设及渔业发展，为印尼万丹省南部居民创造更多就业与商业机会。

六、摩罗泰经济特区：探索与海南的“双岛合作”

在印尼东部，Jababeka 通过 PT Jababeka Morotai 开发摩罗泰经济特区。

摩罗泰的发展战略首先强调教育、医疗和人力资源培养，以便当地居民能够参与未来投资项目。现有酒店和商业店屋设施将逐步用于教育培训、职业技能发展、医疗服务以及经济活动。

通过摩罗泰总统职业高中（SMK Presiden Morotai）等职业教育计划，Jababeka 希望培养能够服务于旅游、酒店管理、渔业、物流、贸易和国际合作的年轻人才。

Jababeka 正探索与中国海南省相关机构及企业的潜在合作机会，拟围绕“双岛合作”（Twin Island）理念，在旅游、教育、医疗、渔业及海洋物流等领域寻求合作。目前，这仍处于合作机会探索阶段，不代表双方已签署合作谅解备忘录。

摩罗泰可以借鉴海南的发展经验。海南省省会海口已经成为国际会议、经贸交流及海洋合作的重要城市；海南南部的三亚则以国际度假村、滨海旅游、酒店服务和国际旅游目的地建设而闻名。

通过加强机场、港口、物流和旅游基础设施建设，摩罗泰未来有潜力发展成为国际会议与会展中心（MICE）、国际海洋合作与投资论坛举办地、海洋渔业及水产品加工基地、印尼东部贸易与物流枢纽，以及教育、医疗和旅游服务中心。

摩罗泰现有机场基础设施可以成为未来加强国内外航空连接的基础，但国际航空服务仍需要相应的设施改善与监管批准。

随着国际合作和物流网络逐步建立，摩罗泰有望带动北马鲁古省经济增长，创造就业机会，并加强印尼东部与亚太地区的经济联系。

七、建设 100 座城市，就是建设 100 个经济与生活生态系统

Jababeka 的长期愿景，是通过与各级政府、当地企业家、国际投资者、教育机构及战略合作伙伴携手，在印尼建设 100 座城市和经济中心。

不同地区拥有不同的经济优势。芝卡朗以工业、教育和医疗为基础；肯达尔重点发展国际制造业；丹绒勒松重点发展旅游、教育和海洋经济；摩罗泰则致力于发展海洋旅游、渔业、教育、医疗及印尼东部物流。

但所有城市的发展都需要一个共同基础：受过良好教育、身体健康、具有纪律精神并能够开展国际合作的人才。

因此，学校、大学、诊所和医院，并不是工业园区开发的附属设施，而是区域长期竞争力的重要组成部分。

八、为投资者和社会创造长期价值

通过上述战略，KIJA 希望建立两大财务增长引擎：一是工业地产和园区开发，二是能够持续产生经常性收入的基础设施业务。

与此同时，教育、医疗、丹绒勒松和摩罗泰的发展，将增强区域经济生态系统并创造长期增长机会。

对于资本市场投资者而言，Jababeka 的发展战略体现了公司的资产基础、国际合作网络以及未来业务扩张潜力。各项目的经济回报仍将取决于市场需求、资金安排、执行能力和合作成果。

Darmono 认为，印尼拥有丰富的自然资源、庞大的人口以及连接全球的重要地理位置。如果能够将这些优势与教育、医疗、先进技术、国际资本和全球市场相结合，印尼便有机会创造更广泛、更持久的繁荣。

建设城市，就是培养人才；培养人才，就是建设国家的未来。

这正是 Jababeka 建设 100 座城市的核心理念。

Think Big, Start Small, Move Fast.

Building Cities, Developing People, Improving Health, Bringing Civilizations Together.

建设城市，培养人才，改善健康，促进文明交流。

JABABEKA | INVESTOR FEATURE • ENGLISH

JABABEKA (KIJA) ENTERS A NEW ERA OF GROWTH: INFRASTRUCTURE, INDUSTRIAL PROPERTY, EDUCATION AND HEALTHCARE TO SUPPORT ITS VISION OF 100 CITIES

Jababeka strengthens its infrastructure business through mergers and acquisitions, positions Kendal Industrial Park as a key driver of property earnings, explores international cooperation opportunities for Tanjung Lesung and Morotai, and builds upon 25 years of investment in education and healthcare through President University and President University Research & Teaching Hospital.

JAKARTA, October 2026 — PT Kawasan Industri Jababeka Tbk (IDX: KIJA) is preparing for its next stage of long-term growth by strengthening two principal business engines: infrastructure services that generate recurring income, and industrial estate and property development that create value through investment and economic expansion.

The strategy is complemented by the development of two Special Economic Zones (SEZs), Tanjung Lesung in Banten and Morotai in North Maluku, as well as Jababeka’s longstanding commitment to education, healthcare, international cooperation, and human capital development.

Jababeka plans to present this broader growth strategy to fund managers, securities firms, capital market analysts, and institutional investors at an upcoming investor gathering.

According to S. D. Darmono, Founder of Jababeka, the company’s mission has never been limited to selling industrial land. Its broader objective has always been to create sustainable economic ecosystems that attract investment, generate employment, develop human resources, and improve the quality of life of surrounding communities.

1. Jababeka Infrastructure: Expanding Recurring Income Through Mergers and Acquisitions

Jababeka is strengthening PT Jababeka Infrastruktur (JI) by introducing Didiek Hartantyo, former President Director of PT Kereta Api Indonesia (Indonesian Railways), as its President Commissioner.

Didiek previously served as Finance Director and President Director of Indonesian Railways and held senior corporate banking responsibilities at Bank Mandiri.

His experience in corporate finance, infrastructure management, and large-scale organizational transformation is expected to support JI's next stage of expansion.

Jababeka intends to grow JI through selective mergers, acquisitions, and strategic partnerships involving infrastructure businesses with strong cash flows and attractive long-term prospects.

Priority sectors include electricity and energy, water supply, wastewater treatment, logistics, and essential infrastructure supporting industrial estates and integrated townships.

Through disciplined investment and effective operational management, JI is expected to become an increasingly important contributor to KIJA's recurring revenue and long-term earnings.

2. Kendal Industrial Park: A Major Engine of Industrial Property Growth

While JI focuses on recurring infrastructure income, Kendal Industrial Park (KIK) is positioned as one of the principal growth engines for KIJA's industrial property business.

KIK is a joint venture between Jababeka and Singapore-based Sembcorp Development, with equity interests of 51% and 49%, respectively.

The partnership combines Jababeka's extensive experience in Indonesian industrial estate development with Sembcorp's international networks and capabilities in developing industrial communities.

With its Special Economic Zone status, Kendal has emerged as an attractive manufacturing investment destination in Indonesia.

During the first half of 2026, Kendal contributed approximately 71% of KIJA's total marketing sales of Rp1.19 trillion.

With continued international manufacturing investment, Kendal is expected to make an increasingly important contribution to KIJA's industrial property revenues and earnings.

3. President University: A Human Capital Strategy Initiated 25 Years Ago

Jababeka's commitment to human capital development began more than a quarter of a century ago.

In 2001, S. D. Darmono established the President University Education Foundation, together with prominent Indonesian national figures and academics, including the late Professor Juwono

Sudarsono, who previously served as Indonesia’ s Minister of Education and Culture and Minister of Defence.

According to Darmono, the initiative also received the blessing and support of President Abdurrahman Wahid, widely known as Gus Dur.

The underlying objective was to prepare Indonesian professionals capable of working in an international industrial environment, while enhancing Indonesia’ s competitiveness in attracting foreign direct investment.

Cikarang, surrounded by seven major industrial estates and thousands of factories established by companies from many countries, provided an ideal environment for this educational vision.

These multinational companies offer opportunities for internships, practical industrial training, and on-the-job learning.

President University’ s educational philosophy emphasizes not only academic knowledge, but also practical skills, foreign language proficiency, industrial discipline, teamwork, and international exposure.

Dormitory Life and International Friendship

Another distinguishing feature of President University is its emphasis on international friendship and cross-cultural understanding.

Through its residential education approach, Indonesian and international students are encouraged to live, study, and interact with people from different nationalities, ethnic backgrounds, cultures, and religions.

Students learn to appreciate differences, understand other cultures, develop independence, and build personal discipline and mutual respect.

Darmono believes that friendships formed during university life can become valuable foundations for international business, scientific collaboration, and peaceful cooperation among nations.

International graduates who have lived and studied in Indonesia may later become bridges between Indonesia and their home countries. Likewise, Indonesian graduates gain the confidence and cultural awareness needed to work in multinational organizations.

This philosophy is embodied in President University’ s guiding principle: Bringing Civilizations Together.

4. From a Community Clinic to a Faculty of Medicine and Modern Teaching Hospital

Jababeka’s commitment to public healthcare began long before the development of modern hospital facilities in Cikarang.

Approximately 30 years ago, during the early development of Tanjung Lesung, Jababeka established a healthcare clinic to serve communities in southern Banten.

According to Darmono, healthcare facilities in the region were extremely limited at that time, requiring many residents to travel considerable distances to obtain appropriate medical treatment.

The establishment of the clinic reflected a fundamental principle of Jababeka’s development philosophy: Industrial and tourism development should benefit not only investors and visitors, but also improve education, healthcare, and living conditions for local communities.

This commitment has now evolved into higher medical education and the development of modern healthcare services.

In 2023, President University officially established its Faculty of Medicine, with particular emphasis on occupational health, medical education, and public health. The Faculty also collaborates with Universitas Padjadjaran through an Academic Health System approach.

Located within one of Indonesia’s largest industrial communities, the Faculty of Medicine has a unique opportunity to develop expertise in occupational medicine, industrial safety, preventive healthcare, and workers’ wellbeing.

The next milestone is the establishment of President University Research & Teaching Hospital (PURTH), also known as President University Hospital.

The hospital held its soft opening on October 10, 2026, as part of the development of Jababeka Medical City.

PURTH is designed to progressively integrate four core functions: healthcare services, clinical education, medical research, and healthcare innovation.

Its long-term development plan includes advanced diagnostics, health screening, cancer care, cardiovascular services, and collaboration with international medical experts and research institutions.

For multinational industrial investors, access to quality schools, universities, hospitals, and healthcare facilities is becoming increasingly important.

Companies selecting an investment location consider not only land, electricity, water, and logistics, but also the quality of life available to employees and their families.

With President University, its Faculty of Medicine, and PURTH, Jababeka aims to strengthen Cikarang's attractiveness as a place to invest, work, live, study, and conduct research.

5. Tanjung Lesung SEZ: Exploring Twin Parks Opportunities with Fuzhou, China

Through its subsidiary PT Banten West Java Tourism Development (BWJ), Jababeka continues to develop Tanjung Lesung Special Economic Zone as an international tourism and coastal economic destination.

Beyond tourism development, Jababeka has supported the establishment of educational facilities in Cikadu and surrounding communities, including primary and secondary schools and President Senior High School.

These educational initiatives complement the healthcare services introduced approximately three decades ago.

Following reciprocal visits and preliminary contacts between Jababeka and relevant parties in Fuzhou, China, BWJ is exploring potential cooperation under the proposed Two Countries, Twin Parks concept, particularly in tourism, education, fisheries, and related processing industries. No memorandum of understanding (MoU) or formal project agreement has been signed.

The proposal is consistent with the broader direction of Indonesia–China economic cooperation. Any specific project would require further discussions, mutual agreement, and the relevant approvals; no government-backed project commitment is implied at this stage.

Through international investment, vocational education, tourism development, fisheries, and supporting infrastructure, Jababeka hopes to create additional employment and business opportunities for communities in southern Banten.

Tanjung Lesung is expected to develop progressively into an international coastal tourism destination and an important regional economic center.

6. Morotai SEZ: Education, Healthcare, and Exploring Twin Island Opportunities with Hainan

In eastern Indonesia, Jababeka is developing Morotai Special Economic Zone through PT Jababeka Morotai.

Unlike conventional industrial estate developments that prioritize land sales, Morotai’ s initial strategy places particular emphasis on education, healthcare, and human capital development.

Existing hotel and commercial shop-house facilities will be progressively utilized to support education, vocational training, healthcare services, and emerging economic activities.

Through President Vocational High School in Morotai (SMK Presiden Morotai) and associated vocational education initiatives, Jababeka aims to prepare young people in North Maluku to participate in emerging opportunities in fisheries, tourism, hospitality, logistics, trade, and international cooperation.

Jababeka is exploring potential cooperation opportunities with relevant partners in Hainan Province, China, under the proposed Twin Island concept, particularly in tourism, education, healthcare, fisheries, and maritime logistics. No memorandum of understanding has yet been signed for this proposed cooperation.

Morotai can draw valuable lessons from Hainan’ s economic transformation. Haikou, the capital of Hainan, has developed into an important destination for international conferences, economic exchanges, and maritime cooperation forums.

Sanya, in southern Hainan, has become internationally recognized for its coastal resorts, hospitality industry, and tourism infrastructure.

By strengthening airport connectivity, seaport facilities, hospitality services, and logistics infrastructure, Morotai has the potential to develop into an international Meetings, Incentives, Conventions and Exhibitions (MICE) destination; a venue for international maritime cooperation and investment forums; a regional fisheries processing and distribution center; a strategic logistics and trading hub for eastern Indonesia; and a center for tourism, vocational education, and healthcare services.

Morotai’ s existing airport infrastructure provides a foundation for improved connectivity. International air services would require further infrastructure development and appropriate regulatory approvals.

As international partnerships, tourism, logistics, and fisheries-related investments progress, Morotai could contribute significantly to economic development in North Maluku. Its strategic position also creates opportunities to strengthen Indonesia’ s economic connectivity with other Asia-Pacific markets.

7. Developing 100 Cities Means Building 100 Sustainable Economic Ecosystems

Jababeka’ s long-term vision is to develop 100 cities and productive economic centers throughout Indonesia through partnerships with government institutions, local entrepreneurs, international investors, educational institutions, and strategic business partners.

Each location possesses different competitive advantages.

Cikarang is being developed as a center for industry, education, healthcare, and innovation. Kendal is emerging as a center for international manufacturing investment. Tanjung Lesung is focused on tourism, education, and the coastal economy. Morotai is being positioned for maritime tourism, fisheries, education, healthcare, and logistics in eastern Indonesia.

However, all these developments share one fundamental requirement: a healthy, educated, skilled, disciplined, and internationally connected workforce.

The experience of establishing schools, a university, community clinics, and a teaching hospital demonstrates that education and healthcare are not merely supporting facilities. They are essential long-term investments in people and regional competitiveness.

8. Creating Long-Term Value for Investors and Society

Through this strategy, KIJA seeks to build two principal engines of financial growth: industrial property development and infrastructure businesses that generate recurring revenue.

At the same time, the development of education, healthcare, Tanjung Lesung, and Morotai strengthens the broader economic ecosystem and creates potential sources of long-term growth.

For capital market investors, the strategy highlights Jababeka’ s established asset base, infrastructure capabilities, international partnerships, and long-term development opportunities.

The financial contribution of each activity will depend on ownership structures, market demand, investment execution, financing arrangements, and operational performance.

Darmono believes that Indonesia possesses abundant natural resources, a large population, and a strategic geographic position connecting major international markets.

By combining these advantages with education, healthcare, advanced technology, international capital, and global market access, Indonesia can create broader and more sustainable prosperity.

For Jababeka, the vision of developing 100 cities is therefore not simply about expanding industrial estates and property projects. It is about developing productive economic communities where people can study, work, establish businesses, access quality healthcare, and create a better future.

Building cities means developing people. Developing people means building the future of the nation.

This is the foundation of Jababeka’ s long-term vision.

Think Big, Start Small, Move Fast.

Building Cities, Developing People, Improving Health, Bringing Civilizations Together.
